Subject: Re: Private Water Well Testing for SJRWP

Marilyn,

Thanks for the information. However, ground water sampling from wells below the waste pits shows that the dioxin/furan and PCB contamination from San Jacinto River Superfund Site waste pits has not reached the deeper aquifer (all aquifer samples were non-detect for dioxins/furans and PCBs). Therefore, the EPA has no plans at this time to perform sampling of additional wells in the area. Should anyone in the community wish to discuss this further, please feel free to ask them to contact me.

Regards,

Gary Miller, P.E. (inactive)

Subject: Private Water Well Testing for SJRWP

Hi Gary,

Wanted to let you know that we have had a request from Ms. Young about having her private water well tested because of many years of health problems. She lives about 3 miles from the site at 603 N. Main, Highlands TX. 77562.

I understand that a decision about testing private water wells in the area has not been finalized but you would like to know of the request and address. Please keep us posted on your decision.

Thanks

Marilyn Christian, R.S.
